WORK EXPERIENCE

Help Desk Analyst
Learning and Technology Services Help Desk, University of Wisconsin, Eau Claire
August 2022 – Present
- Identify root problems of software/hardware issues and implement quick solutions.
- Improve skills and knowledge of new operating systems to provide consistent customer support and increase the rate of first level resolution.
- Collaborate with Tier 2 help desk support to resolve complex problems that need to be escalated.
- Utilize effective problem triage to resolve more than 30 tickets per day.
- Educate users on appropriate use of campus software to enhance productivity.

Student Outreach Assistant
Student Central, Chippewa Valley Technical College
October 2021 – May 2022
- Made outreach phone calls to students which resulted in an increase in class enrollments.
- Successfully promoted events on campus that led to a growth in student involvement.
- Educated students on various college processes

PERSONAL PROJECTS

Android Recipe App
GitHub Repository**: https://github.com/oadegokee/Recipe_Finder#readme**
- **Technologies used**: MealDB API, Java, GitHub, Android Studio
- Developed an android app using Java that allows users to search for recipes and add their recipes
- Integrated MealDB's API allowing users to view recipes and have access to YouTube videos of the recipe, if available.
- Used an SQLite Database allowing users to add and store their recipe in the app.

Weather Website
Website: **https://oadegokee.github.io/weathercast/**
- **Technologies used**: OpenWeatherMaps API, JavaScript, HTML, CSS, Git, GitHub
- Developed a weather site that allows users to see the current weather and forecast of their location.
- Enabled ability for users to search for a location using city name or zip code and switch between Fahrenheit and Celsius.
- Implemented responsive web design which responds to the user's behavior based on screen size and browser.

Book Search Website
Website**: https://oadegokee.github.io/2021_BookNet/**
- **Technologies used**: Google Books API, JavaScript, HTML, CSS, jQuery, Git, GitHub
- Collaborated with other developers to develop a Book finder website that allows users to search for books by title, author, ISBN or genre.
- Integrated jQuery library to build effects and animations on the page.

SKILLS

Software: JavaScript, Java, Swift, HTML, SQL, CSS, Git, jQuery, PHP, API, Visual Basic.
